  - Schema aware paste strategies
  - Content completion and schema aware strategies
  - Handle typing in invalid positions
  - *Schema aware* options page

- Paste strategies

  - duplicate right or left sibling - p between two list items

  - insert to the right or to the left in the adjacent elements - li after the itemizedlist

  - insert in an ancestor in a valid position - h2 in para

  - split ancestor and insert the content - h2 in para from sect1

  - unwrap - h2 with title in a sect2 without title

  - strip markup - paste as text

  - invalid insert

- Paste in Grid
  - Paste in Grid from HTML, spreadsheets etc. - lines of TAB separated values
  - Paste with well-formed XML content

- Paste in other applications from Oxygen
  - Copy from text page with syntax-highlight
  - Copy from Grid page in HTML or RTF format
